Creating Signup Screen Backend Apis

Task Points: 100 ~~200~~ ?

Task Status: **Completed**

Task details

Deliverables (Do it by yourself)

1. For Sign up, take the name, email, phone number, password from the user from the frontend.Call the backend API and store this in the DB.
2. Call the backend APIs via postman to test them (Optional)
3. Also handle the various cases. If the user already exist show that "User already exists".
4. Dont forget to encrypt the password using bcrypt library before storing it in database.

Push the code to git and upload the commit id
