

Description

Hints

Integrating the frontend with backend

Task Points: 100

Task Status: **Completed**

Task details

Improving the security of the app while integrating

The right way to handle CORs in production.

[Watch this video](#) to understand.

Now from the frontend call the `/signup api`

Deliverables

1. On successful signup show an alert on the browser "Successfully signed up".
2. If user already exists show an alert stating "User already exists, Please Login"
3. CORs should be handled correctly and not like the old way. [Super important]
4. Answer this question . What is OPTIONS call and when does it happen and why does it happen.(Favourite Interview question)

Push the code to git and upload the commit id
