

Description

Hints

Lets make the Chat App real time

Task Points: 100 ~~200~~ ?

Task Status: **Completed**

Task details

Deliverable:-

One way to solve the problem of page refreshing to get new message is by continuously calling the API from the frontend every 1 second.

use `setInterval(() => . call Api , 1000)`

Update the new message onto the screen.

Now your chat Application is real time . Congratulations!!!!
