Get the messages from the Database

Task Points: 50 ~~100~~ ?   Task Status: **Completed**

Task details

1. Create an Api which gets the list of all the message when the user refreshes the page.
2. Call this Api from the frontend whenever the user refreshes the page

The main problem of your current chat Application is that , in order to get the new messages the user has to refresh the page.
How can you solve this? Any ideas?

Push the code to git and upload the commit ID
